Ninth outslugged the Foundry leaders vesterday, but missed out on a victory by just one run-15 to 14.

The Trailers in their last game out batted their opponents, but lost the game in the same way as Friday— errors and lots of them.

Right off the reel, the Babes com-nenced spanking the ball, and they kept it up to the end, but the great show in the big tent was pulled off in the eighth when they hammered Bryan for six singles and Hutch for one. It was a joysome affair, and the rejuven-ated, perspiring trailers looped the loop around the circuit most gleefully. A batting rally of such juicy proportions by the much-beaten cellarites was a re. HOW BEES EMBALM.

Bees can embalm as well as any undertaker. All intruders on their lives are slain and embalmed carefully. If a worm, or a roach, or an insect blunders into a hive the bees fall upon him and slay him with their stings. To get the corpse out would be difficult, therefore, embalming it, they let it remain.

simple. It consists of covering the corpse with a hermetic coat of pure wax. Within this airtight envelope the body remains fresh. It cannot in any way contaminate the hive.

When a snail blunders in among the bees they cannot kill him on account of the protection of his shell. So they embalm him allve. They cover him, shell and all, with snowy wax. He is a prisoner whom only death releases.— Scienific American.
